RE: Allen County  
Orbitron Industries  
Hazardous Waste Complaint  
Second Notice of Violation

July 28, 1994

**CERTIFIED MAIL**

Mr. Tom Cooper  
Orbitron Industries  
4101 Edison Lakes Parkway  
Suite 160  
Mishawaka, Indiana 46565

Dear Mr. Cooper:

On June 3, 1994, the Ohio Environmental Protection Agency (Ohio EPA) inspected the Orbitron Industries (Orbitron) facility in Delphos, Ohio in response to a citizen complaint concerning the management of hazardous wastes at Orbitron. A Notice of Violation was sent to Orbitron on July 7, 1994, specifying violations that Ohio EPA noted during the inspection. To date, Orbitron has failed to respond to the July 7, 1994 Notice of Violation and remains in violation of the following:

- (1) Waste Analysis, Ohio Administrative Code (OAC) rule 3745-52-11: Any person who produces a waste in the state of Ohio shall evaluate the waste to determine if it is hazardous in accordance with OAC Chapter 3745-51.

Orbitron has approximately forty (40) fifty-five gallon drums located in a storage area outside, two of which are labelled "Used MEK" and three of which are currently open. There are also approximately forty (40) fifty-five gallon drums located inside the main building of the facility. In addition, there are approximately forty fifty-five gallon drums located on the loading dock and approximately another eight fifty-five gallon drums in the Oil House, one of which is labelled "used solvent". There are also six (6) boxes labelled "oxidizer" in the main building. Orbitron was unable to provide information on the contents of these containers.

Orbitron is immediately required to analyze the contents of the above listed containers for the following parameters: waste characteristics, volatile organic compounds, semi-volatile compounds, PCBs, and metals. The results of this analysis is to be submitted to the Northwest District Office of the Ohio EPA as soon as it is available.

Orbitron must also submit documentation to the Northwest District Office of the Ohio EPA detailing the following information concerning their Delphos facility: amount of hazardous waste generated per month and how the hazardous waste generated is managed and disposed of.

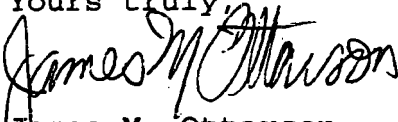

Orbitron must also take steps immediately to mitigate the threat to human health and the environment posed by the three open drums in the outdoor container storage area.

Please be advised that continued noncompliance with applicable hazardous waste rules may be cause for enforcement action by this Agency pursuant to Chapter 3734 of the Ohio Revised Code.

Please respond, in writing, to this Notice of Violation within ten days. Further, please provide a response to the violation noted in this letter in accordance with the instructions accompanying the violation. Your response must include all actions and timetables necessary to demonstrate compliance. Should you have any questions, please feel free to call me at this office.

Failure to list specific deficiencies in this communication does not relieve Orbitron from the responsibility of complying with applicable hazardous waste regulations. This letter does not relieve Orbitron from liability for any past or present violations of the state's hazardous waste laws.

Yours truly,

James M. Ottarson  
Division of Hazardous Waste Management
